Overview

These courses give a general educational background of the earth's geology, atmosphere, oceans and its place in time and space.

TRANSFER MAJOR REQUIREMENTS are available in the Counseling Center. In all cases, students should consult with a counselor for specific transfer requirements. Positions for which four-year graduates in the disciplines in Earth Science are qualified include teaching, research, industry, regional planning, environmental analysis and others in the minerals-fuels industries.

Faculty

Alejandro E. Amigo

Professor, Earth Science

M.S., University of Buenos Aires

Ph.D., University of Florida

M.A., University of California, Davis

Frank L. DeCourten

Professor, Earth Science

B.S., University of California, Riverside

M.S., University of California, Riverside

Holly Dodson

Professor, Earth Science

B.S., University of California, Riverside

M.A., University of California, Santa Barbara

Richard P. Hilton

Professor, Earth Science

A.S., College of Marin

B.A., California State University, Chico

M.A., California State University, Chico

Degrees/Certificates

Associate Degree for Transfer

- Geology for Transfer (p. 1)

- Geology (p. 2)

Geology for Transfer

AS-T Degree

Geology investigates our planet Earth from diverse perspectives, spanning from the smaller scale study of its building blocks (minerals) to the larger scale study of its dynamism (Theory of Plate Tectonics), as well as its history and the relationship between the physical environment and the evolution of life. This is accomplished by viewing the planet as a system, where there are interactions between the lithosphere, the atmosphere, the hydrosphere and the biosphere. Within this context, students develop strong critical thinking, problem solving, communication and technical skills to work in a relatively large set of career fields beyond that of Geology, such as Hydrology, Geophysics, Oceanography, Meteorology and Environmental Science. The required curricular sequence also provides the necessary skills in the physical sciences and mathematics required for junior standing at baccalaureate institutions. Thus, future Earth Scientists acquire both a global and sequential way to approach topics, with an emphasis on the interdisciplinary nature of the field and also enhance their expertise through hands-on laboratory work, readying themselves for the applied nature of the workforce (industry, consulting and government agencies).

The Associate in Science in Geology for Transfer degree (AS-T) prepares students to transfer into the CSU system to complete a bachelor's degree in Geology or a major deemed similar by a CSU campus. Students earning an associate degree for transfer and meeting the CSU minimum transfer admission requirements are guaranteed admission with junior standing to the CSU system, but not to a particular campus or major. Upon transfer, students will be required to complete no more than 60 additional prescribed units to earn a bachelor's degree.

To earn the Associate in Science in Geology for Transfer degree, students must complete 60 CSU-transferable semester units with a minimum grade point average of 2.0, including both of the following:

- completion of all courses required for the major with grades of "C" or better; and
- completion of the California State University General Education Breadth (CSU GE) (<http://catalog.sierracollege.edu/student-resources/general-education/california-state-university-general-education-breadth-requirements>) pattern or the Intersegmental General Education Transfer Curriculum (IGETC) (<http://catalog.sierracollege.edu/student-resources/general-education/intersegmental-general-education-transfer-curriculum-igetc>) pattern. (Students transferring to a CSU campus using IGETC must complete Area 1C Oral Communication to be eligible for admission.)

The exact wording of the law pertaining to associate degrees for transfer may be found in Education Code Section 66746.

It is highly recommended that, prior to transferring, students complete courses that satisfy the CSU United States History, Constitution and American Ideals graduation requirement. In all cases, students should consult with a counselor for more information on university admission and transfer requirements.

RESTRICTION: International coursework from non-United States regionally accredited institutions cannot be applied to associate degrees for transfer.

Required Courses

ESCI 0001	Physical Geology	3
ESCI 0001L	Physical Geology Laboratory	1
ESCI 0003	Historical Geology	3

ESCI 0003L	Historical Geology Laboratory	1
CHEM 0001A	General Chemistry I (OR)	5-6
or CHEM 0003A & CHEM 0003B	General Chemistry I - Part 1 and General Chemistry I - Part 2	
CHEM 0001B	General Chemistry II	5
MATH 0030	Analytical Geometry and Calculus I	4
MATH 0031	Analytical Geometry and Calculus II	4
Total Units		26-27

Additional Recommended Preparation

While the following courses are not required for this degree, completion of these courses will better prepare students for upper-division geology courses.

PHYS 0205 & 0205L	Principles of Physics: Mechanics and Principles of Physics Laboratory: Mechanics	5
PHYS 0210 & 0210L	Principles of Physics: Electricity and Magnetism and Principles of Physics Laboratory: Electricity and Magnetism	4
PHYS 0215 & 0215L	Principles of Physics: Heat, Waves and Modern Physics and Principles of Physics Laboratory: Heat, Waves and Modern Physics	4

Geology AS Degree

A two-year associate degree in Geology prepares students to work in entry-level technical positions in the geological profession, including such fields as environmental assessment and mitigation, hydrology, mining, agronomy, conservation and interpretation. Additional professional opportunities are available for students with advanced degrees. In all cases, students should consult with a counselor for more information on university admission and transfer requirements. Students must fulfill the following major requirements with grades of "C" or better, complete a minimum of 60 degree-applicable semester units (12 of which must be completed at Sierra College) with a grade point average of at least 2.0 and complete one of the following three general education patterns:

- Sierra College Associate Degree Requirements (<http://catalog.sierracollege.edu/student-resources/general-education/associate-degree-requirements>);
- California State University General Education Breadth (<http://catalog.sierracollege.edu/student-resources/general-education/california-state-university-general-education-breadth-requirements>) pattern;
- Intersegmental General Education Transfer Curriculum (IGETC) (<http://catalog.sierracollege.edu/student-resources/general-education/intersegmental-general-education-transfer-curriculum-igetc>).

Required Courses

ESCI 0001	Physical Geology	3
ESCI 0001L	Physical Geology Laboratory	1
ESCI 0003	Historical Geology	3
ESCI 0003L	Historical Geology Laboratory	1

Select 1-2 units from the following: ¹ 1-2

ESCI 0054A	Sierra Nevada and Western Basin and Range Provinces	
ESCI 0054B	Great Valley and Coast Range Provinces	
ESCI 0054C	Great Valley, Coast Ranges, and Sutter Buttes	
ESCI 0054D	Western Sierra Nevada and the Mother Lode	
ESCI 0054E	Major Rock Units of the Northern Sierra	
ESCI 0055C	Weekend Field Geology-Point Reyes	
ESCI 0055F	Weekend Field Geology	
ESCI 0056F	Field Geology of Western North America	

Select 4-6 units from the following: 4-6

CHEM 0001A	General Chemistry I (OR)	
or CHEM 0003A & CHEM 0003B	General Chemistry I - Part 1 and General Chemistry I - Part 2	
PHYS 0010 & 0010L	Basic Concepts in Physics and Basic Concepts in Physics Laboratory	
PHYS 0105 & 0105L	General Physics I and General Physics I Laboratory	
PHYS 0205 & 0205L	Principles of Physics: Mechanics and Principles of Physics Laboratory: Mechanics	

Select 6-8 units from the following: 6-8

ASTR 0010	Elementary Astronomy	
CHEM 0001B	General Chemistry II	
ESCI 0002	California Geology	
ESCI 0015	Introduction to Oceanography	
ESCI 0015L	Introduction to Oceanography Laboratory	
ESCI 0050	Geology of National Parks and Monuments	
ESCI 0054A	Sierra Nevada and Western Basin and Range Provinces ¹	
ESCI 0054B	Great Valley and Coast Range Provinces ¹	
ESCI 0054C	Great Valley, Coast Ranges, and Sutter Buttes ¹	
ESCI 0054D	Western Sierra Nevada and the Mother Lode ¹	
ESCI 0054E	Major Rock Units of the Northern Sierra ¹	
ESCI 0055C	Weekend Field Geology-Point Reyes ¹	
ESCI 0055F	Weekend Field Geology ¹	
ESCI 0056F	Field Geology of Western North America ¹	
GEOG 0004	Weather and Climate	
GEOG 0090	Introduction to Geographic Information Systems (GIS)	
MATH 0029	Pre-Calculus Mathematics	
MATH 0030	Analytical Geometry and Calculus I	
PHYS 0110 & 0110L	General Physics II and General Physics II Laboratory	

PHYS 0210 & 0210L	Principles of Physics: Electricity and Magnetism and Principles of Physics Laboratory: Electricity and Magnetism	
PHYS 0215 & 0215L	Principles of Physics: Heat, Waves and Modern Physics and Principles of Physics Laboratory: Heat, Waves and Modern Physics	
Total Units		19-24

¹ Only 3 units total may be taken from the field studies courses.

Courses

Understanding course descriptions (<http://catalog.sierracollege.edu/student-resources/course-information/understanding-course-descriptions>)

ESCI 0001. Physical Geology

Units: 3

Formerly known as GEOL 1

Prerequisite: Eligibility for ENGL 1A

Advisory: Concurrent enrollment in ESCI 1L

Hours: 54 lecture

Dynamic nature of earth's geologic processes. Earthquakes, volcanoes, mountain building, landslides, rocks, minerals, fossils, erosion, glaciation, deserts, shorelines, groundwater, and plate tectonics. (C-ID GEOL 100) (CSU, UC)

ESCI 0001L. Physical Geology Laboratory

Unit: 1

Formerly known as GEOL 1L

Prerequisite: Completion of or concurrent enrollment in ESCI 1

Hours: 54 laboratory

Minerals, rocks, fossils, aerial photos, topographic and geologic maps. Field trip(s) may be required during regular lab time. (C-ID GEOL 100L) (CSU, UC)

ESCI 0002. California Geology

Units: 3

Formerly known as GEOL 2

Advisory: Completion of ESCI 10 with grade of "C" or better

Hours: 54 lecture

An introduction to the geology of California, including tectonic processes, geologic structures, physiographic provinces, local rocks and minerals, landforms, natural resources, geologic history, and natural hazards in the state. (C-ID GEOL 200) (CSU, UC)

ESCI 0003. Historical Geology

Units: 3

Formerly known as GEOL 3

Corequisite: Concurrent enrollment in ESCI 3L

Advisory: Completion of ESCI 1 and 1L with grades of "C" or better

Hours: 54 lecture

An introduction to Earth's history and the life it supports. Includes geologic dating, plate tectonics, stratigraphy, fossils, biological evolution, the planet's origin, and the processes that have influenced paleogeography during the past 4.6 billion years. Designed for Geology majors. (C-ID GEOL 110) (CSU, UC)

ESCI 0003L. Historical Geology Laboratory

Unit: 1

Formerly known as GEOL 3L

Corequisite: Concurrent enrollment in ESCI 3

Hours: 54 laboratory

Hands-on learning in the topics of Earth history. Includes geologic dating, fossils, plate tectonics, minerals and rocks, biological evolution, the planet's origin, and the processes that have influenced paleogeography and life history during the past 4.6 billion years. (C-ID GEOL 110L) (CSU, UC)

ESCI 0007. Energy, Environment, and Climate

Units: 3

Also known as ESS 7

Advisory: Eligibility for ENGL 1A

Hours: 54 lecture

Analysis of the nature of energy and the environmental impact of its societal use in the context of Earth's record of changing climate. Explores current global climate change due to post-1750 greenhouse gas emissions and strategies for mitigation and adaptation to changing climate predictions, emphasizing future alternative energy sources. Designed for students majoring in areas related to the environmental sciences and/or those interested in developing a substantiated understanding of the role played by citizens in ensuring a healthy environment for future generations. (CSU, UC)

ESCI 0010. Introduction to Earth Science

Units: 3

Prerequisite: Eligibility for ENGL 1A

Hours: 54 lecture

Introduction to concepts of geology, oceanography, meteorology, and astronomy for science or nonscience majors. (C-ID GEOL 120) (CSU, UC)

ESCI 0010L. Introduction to Earth Science Laboratory

Unit: 1

Prerequisite: Completion with grade of "C" or better, or concurrent enrollment in ESCI 10

Hours: 54 laboratory

Exploration of the solid Earth, its atmosphere, hydrosphere, and place in the solar system. Learning through investigation and systematic laboratory procedures, focused on the physical and chemical systems of the Earth such as the tectonic cycle, rock cycle, hydrologic cycle, weather and climate. Field trip(s) may be required during regular lab time. (C-ID GEOL 120L) (CSU, UC)

ESCI 0015. Introduction to Oceanography

Units: 3

Advisory: Eligibility for ENGL 1A or equivalent

Hours: 54 lecture

Physical, chemical, and biological aspects of our ocean environment with emphasis on geologic processes. (CSU, UC)

ESCI 0015L. Introduction to Oceanography Laboratory

Unit: 1

Prerequisite: Completion of or concurrent enrollment in ESCI 15

Hours: 54 laboratory

Exploration of the ocean environment, including physical, chemical and biological aspects. Learning through investigation and systematic laboratory procedures. (CSU, UC)

ESCI 0016G. Field Paleontology and Ancient Environments*Units: 1-4*

Also known as BIOL 16G

Formerly known as GEOL 16G

Hours: 30 (12 lecture, 18 laboratory) per unit

Investigations into the ecology of environments in the geologic past through field work at fossil sites. Comparisons/contrasts made between ancient (fossil) communities and the current (living) communities of selected study sites. Differences and similarities between the plants and animals used as evidence to reconstruct ancient ecological communities. Students may be required to provide their own transportation. (CSU)

ESCI 0028. Independent Study*Units: 1-3*

Designed for students interested in furthering their knowledge at an independent study level in an area where no specific curriculum offering is currently available. Independent study might include, but is not limited to, research papers, special subject area projects, and research projects. See Independent Study page in catalog. (CSU, UC-with unit limitation)

ESCI 0050. Geology of National Parks and Monuments*Units: 3*

Formerly known as GEOL 50

Hours: 54 lecture

Investigation of geology and geologic history in the formation of North American national parks and monuments including the Grand Canyon, Bryce, Zion, and Yosemite. (CSU)

ESCI 0054A. Sierra Nevada and Western Basin and Range Provinces*Units: 0.5*

Formerly known as GEOL 51A

Hours: 9 lecture

Field lecture course designed to teach students the geology of portions of the Sierra Nevada and Western Basin and Range Provinces. Sites along I-80 and old highway 40 are examined. Entrance and transportation fees may be required. (CSU)

ESCI 0054B. Great Valley and Coast Range Provinces*Units: 0.5*

Formerly known as GEOL 51B

Hours: 9 lecture

Field lecture course designed to teach students the geology of portions of the Great Valley and the Coast Range Provinces. Sites along I-80, the Russian River, the Pacific Coast, and the San Andreas Fault are examined. Entrance and transportation fees may be required. (CSU)

ESCI 0054C. Great Valley, Coast Ranges, and Sutter Buttes*Units: 0.5*

Formerly known as GEOL 51C

Hours: 9 lecture

Field lecture course designed to teach students the geology of portions of the Great Valley, the Coast Ranges, and the Sutter Buttes. Sites west from Roseville through Woodland and Capay Valley to Clear Lake, the Central Sacramento Valley, and the Sutter Buttes are examined. Entrance and transportation fees may be required. (CSU)

ESCI 0054D. Western Sierra Nevada and the Mother Lode*Units: 0.5*

Formerly known as GEOL 51D

Hours: 9 lecture

Field lecture course designed to teach students the geology of portions of the Western Sierra Nevada and the Mother Lode. Sites along Highway 49 are examined. Entrance and transportation fees may be required. (CSU)

ESCI 0054E. Major Rock Units of the Northern Sierra*Units: 0.5*

Formerly known as GEOL 51E

Hours: 9 lecture

Field lecture course designed to teach students the geology of major rock units of the Northern Sierra Nevada. Moderate day hike is involved. Entrance and transportation fees may be required. (CSU)

ESCI 0055C. Weekend Field Geology-Point Reyes*Unit: 1*

Hours: 18 lecture

Exploration of the natural history of the Point Reyes area, emphasizing its geologic history and geomorphology. Camping, entrance and transportation fees may be required. (CSU)

ESCI 0055F. Weekend Field Geology*Unit: 1*

Formerly known as GEOL 52F

Hours: 18 lecture

Weekend (sometimes including Friday) field trips to selected locations of geologic interest in California and bordering areas. Hiking may be necessary. Camping, entrance and transportation fees may be required. (CSU)

ESCI 0056F. Field Geology of Western North America*Units: 2*

Formerly known as GEOL 53F

Hours: 54 (27 lecture, 27 laboratory)

One-week field experience to selected areas of geologic interest. Emphasis placed on the geologic history of the many parks and monuments of the west. A three-hour pre-session prior to the trip is required. Hiking may be necessary. Camping, entrance and transportation fees may be required. (CSU)

ESCI 0095. Internship in Earth Science*Units: 0.5-4*

Formerly known as GEOL 95

Designed for advanced students to work in an area related to their educational or occupational goal. Provides new on-the-job technical training under the direction of a worksite supervisor, allowing students to expand knowledge and skills in the chosen field. Mandatory orientation session and faculty approval to determine eligibility. One unit of credit is equal to each 60 hours of non-paid work, or each 75 hours of paid work. Students may earn up to a total of 16 units in internship courses (any course numbered 95 and PDEV 94). (CSU-with unit limitation)

Program Student Learning Outcomes (PSLOs)

- Apply the fundamental principles of Earth Science to natural phenomena.
- Solve Earth Science problems using field data.
- Critique, properly manipulate, and present laboratory data needed to solve Earth Science problems.
- Assemble and critique literature relevant to Earth Science investigations.
- Relate Earth Science concepts to real events such as earthquakes, volcanic eruptions, or severe weather events.
